

NIKHIL NARAYANA

AI Agentic Architect | Engineering Leader | Software Architect

Mysore / Bengaluru, India | Open to Global Remote Opportunities | +91 98809 91531 | niks.narayana@gmail.com | linkedin.com/in/nikhil-narayana-dev | clascout.in

PROFESSIONAL SUMMARY

AI Agentic Architect and Engineering Leader with 20+ years of experience architecting and shipping production-grade software. Specializes in multi-agent systems, LangGraph, LangChain, RAG, LLM decision logic, and high-performance state management. Proven track record of delivering 0-to-1 enterprise products, modernizing engineering stacks, leading distributed teams, and connecting business strategy with scalable AI orchestration and resilient software systems.

TECHNICAL SKILLS

AI & Agentic Systems: LangGraph, LangChain, RAG, OpenAI APIs, LLM decision logic, AI-assisted architecture and development, Cursor IDE, Claude Code

Frontend: React, ReactJS, Next.js, TypeScript, Flutter, React Native, Expo

Backend: Node.js, Java, Spring Boot

Cloud & DevOps: GCP, AWS, Azure, Docker, Kubernetes, CI/CD, Cloud Run, Cloud SQL

Data: PostgreSQL, MongoDB, MySQL, Kafka

Security & Streaming: OAuth 2.0, OpenID Connect, HLS, encrypted content delivery

Engineering Leadership: System and cloud architecture, engineering leadership, Agile/Lean delivery, 0-to-1 product development, roadmap and strategy, cross-functional team building, stakeholder communication, distributed team management, change and transformation management

Collaboration & Delivery: GitHub, GitLab, JIRA, Confluence, ClickUp, Slack, Zoom, Microsoft Teams, Hubstaff, asynchronous documentation

PROFESSIONAL EXPERIENCE

Founder & Architect | Clascout, Independent SaaS Platform

May 2026 – Present | 15 paying class owners acquired within first week of launch

- Founded and built Clascout independently, a SaaS platform for class owners to manage fees, attendance, and schedules and for learners to track enrollment across multiple classes.
- Designed the full product, cloud infrastructure, and go-to-market from the ground up as sole architect and primary developer.
- Built self-sustaining infrastructure with near-zero ongoing maintenance and highly automated operations.
- Used Cursor IDE and Claude Code with AI-assisted agentic workflows to accelerate full-stack development, achieving 4x faster feature delivery while maintaining code quality.

Head of Software | Vidwath Innovative Solutions, Mysore

Dec 2025 – May 2026 | Led team of 20 | LMS serving 50,000+ students | 5,000+ hours of content

- Architected and shipped Vidwath 4.0 LMS from scratch as a cross-platform Windows, Web, and Android application from a single codebase in under 3 months, with no additional hires or paid tools.
- Redesigned the offline content encryption pipeline and built automated single-script tooling to replace a manual, error-prone process and reduce piracy risk.
- Established GitHub organization, version-control workflows, coding standards, and CI/CD from zero, improving team engineering practices and code quality.
- Integrated AI tooling including RAG approaches, NotebookLM, and generative content via OpenMAIC; led feasibility research for offline, on-device AI models.
- Pioneered AI-driven development workflows with Cursor and Claude Code; mentored engineers on AI-assisted coding, blocker resolution, and legacy modernization.
- Ran monthly 1:1s and coached the team on soft skills, production management, collaboration, and technical problem solving.

Technical Lead (Frontend) | Athos Commerce (formerly Klevu), Ahmedabad

Jan 2022 – Dec 2025 | Led team of 10 | Platform serving 10,000+ merchants globally

- Led migration of the merchant admin application from a legacy codebase to ReactJS microservices using the Strangler Pattern, delivering significant performance gains with zero downtime for live merchants.
- Drove Jest adoption across the team, achieving 90% test coverage, reducing production bugs, and enforcing quality gates through SonarQube.
- Built an OpenAI-powered synonym suggestion API to recover zero-result searches for a platform serving 10,000+ merchants.

- Maintained an open-source frontend SDK on GitHub and mentored a team of 4 on engineering best practices, code reviews, and modern frontend techniques.
- Built a complete hackathon MVP covering login, Stripe billing, and analytics in ReactJS in 3 days; the implementation became a reference architecture for new features.

Architect & Lead | Bali.love, Remote Freelance Contract

Dec 2024 – May 2025

- Led migration from Bubble to React, Node.js, and PostgreSQL, including full data migration and schema redesign, deployed on GCP Cloud Run and Cloud SQL.

Frontend App Developer | Essence News App, Remote Freelance Contract

Dec 2024 – May 2025

- Developed a news application using Expo and React Native, delivered the MVP in 30 days, and shipped to Android and iOS app stores.
- Coordinated development with the project lead in the UK.

Principal Engineer | Nineleaps Technologies, Bengaluru

Jan 2021 – Jan 2022

- Contributed to TESCO's Help App serving 400,000 employees using React, Node.js, and Kubernetes; resolved Docker deployment issues and made meaningful contributions within 15 days of joining.

Principal Consultant | Qwinix Technologies, Mysore

Jun 2018 – Jan 2021

- Led an 18-member team on HPE's Qbert 2.0 analytics platform using Node.js, React, PostgreSQL, Kafka, Kubernetes, and Azure; selected as the sole India–Costa Rica liaison for onsite collaboration.
- Led a 15-member team for CoolerScreens delivering Access Manager, Planogram App/Editor, Product Catalog, and pricing ingestion pipeline on Azure with OAuth 2.0 and OpenID Connect.
- Secured 4 GCP certifications and 1 AWS certification while on the job.

EARLIER CAREER

Self-Employed | Agriculture & Entrepreneurship

Feb 2010 – Jun 2018

- Built and ran a dairy and agriculture operation covering 100 acres with 30+ employees and 1,000 L/day production; developed in-house software for payroll, dairy management, and attendance while maintaining hands-on technical skills.

Senior Developer | MSCI Inc. (Morgan Stanley Capital International)

Jul 2008 – Feb 2010

Software Developer | i-flex Solutions (now Oracle Financial Services)

2005 – 2008

Software Developer | Dataflex Systems Pvt. Ltd., Mumbai

Jul 2004 – Jan 2005

EDUCATION

B.E. Computer Science | TKIET, Shivaji University | 2003

CERTIFICATIONS & COURSES

- LangChain & LangGraph Foundations — LangChain Academy

ADDITIONAL INFORMATION

Languages: English, Hindi, Kannada

Travel: US B1 Visa valid through 2030; available for periodic global travel for team retreats and onsite engagements.
